Source: The Foundation Center, 2012. Dollar figures in thousands. Figures represent only grants awarded to groups that could be identified as serving specific populations or grants whose descriptions specified a benefit for a specific population. These figures do not reflect giving benefiting these groups. In addition, grants may benefit multiple population groups, e.g., a grant for homeless children, and would therefore be counted more than once. Based on all grants of \$10,000 or more awarded by a national sample of 1,330 larger U.S. foundations. For community foundations, only discretionary grants are included. Grants to individuals are not included in the file.

¹Coding for these groups generally includes "domestic" populations. Overseas grants are only coded for ethnic or racial minorities if they specifically mention a benefit for a particular minority group.
